- **Colorants**

### Common Questions & Answers:

**Q: What does Durt™ taste like?**

**A:** Taste is something that many people can experience differently. Durt products can be mixed with any beverage and should not impact how they taste. When drinking Durt with plain water, many find that it doesn't really change how it tastes at all, and if it does, it's usually described as tasting like spring water.

**Q: What should I expect to experience or feel when taking Durt™ products?**

**A:** The first thing most people report when taking Durt gold is increased alertness and energy due to the fulvic acid content, making it great option to drink at the beginning of each day to give you a boost or before exercise.

**Q: What gives Durt™ gold its coloring?**

**A:** There are no artificial colorings added to the Durt products. The unique gold color of Durt gold is due to the fulvic acid which is naturally gold in color.

**Q: Can I add Durt™ to beverages other than water?**

**A:** Yes, Durt concentrate ampoules can be added to protein shakes, tea, coffee and many other drink options.

**OTHER INGREDIENTS:** PURIFIED WATER

**\* These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.**

Electrolytes are essential minerals. If following the Keto Diet, it is often recommended to consume electrolytes to off-set the flushing effect caused from consuming low glycemic carbohydrates.

**Q: Can I add Durt™ products to hot beverages too?**

**A:** Absolutely. You can add Durt concentrate to both hot and cold beverages without impacting quality.

**Q: What is the best time of day to take Durt™ gold?**

**A:** We recommend taking Durt gold when you need a boost of energy and when you are active.
